# speechmotion®

Healthcare Documentation Platform

SpeechMotion is a leading provider of Voice & Text software solutions for Health Information Services with years of professional experience. SpeechMotion provides a cost effective software application service, in addition to premised-based software solutions. We make a positive difference for organizations we serve by employing experienced medical specialists that are committed to excellence. Our commitment to provide the best healthcare documentation software available produces results that lower facility costs and improve overall patient care.

speechmotion®
Healthcare Documentation Platform

More and more healthcare facilities are faced with shrinking budgets, lack of qualified recruitment candidates and skyrocketing overhead.

SpeechMotion™ provides cost effective, reliable and advanced technology solutions that enhance patient care and reduce facility costs. We offer unique solutions by partnering with your facility to structure a program that fits your needs. We can provide a transaction-based solution or a full outsourced solution. Our professional staff will access your needs and work with you to customize a solution. We are your partner for healthcare documentation solutions.

We recognize that confidentiality is one of the most important aspects of our partnership. Our state-of-the-art technology sends all incoming and outgoing data through encryption processes. Patient confidentiality and security of your processed information is of critical importance to us.

The **SpeechMotion™** is our state-of-the-art technology system incorporating voice capture, speech recognition, editing and distribution. Combined with your our professional experience, this voice & text solution can solve all medical documentation challenges.

SpeechMotion™ is a premier **Software as a Service Provider** that specializes in transactional solutions for voice capture and transcription. Our **SaaS Solutions** are located in robust, redundant and fault-tolerant data centers providing "always on" availability.

Our **Professional Services Team** exceeds partner standards with a knowledge that focuses on technology, software, customer satisfaction and scenario based experiences which prepare us for sales engineering, project management, implementation, integration, programming and customer training responsibilities.

SupportCare is our complete online, on-call support program that includes help center support, maintenance and software assurance. Our certified engineers are available 24/7 to solve challenging problems.

Utilizing our innovative solution, with advanced speech recognition technologies, and our network of experienced Medical Language Professionals and Quality Assurance teams, SpeechMotion delivers accurate medical documentation, exceptional turn-around times, and cost-effective solutions for healthcare organizations.
