

# SECURELY MANAGE DICTATIONS AND PATIENT INFORMATION WITH YOUR PDA OR SMARTPHONE

## Winscribe Medical Mobility Suite

Whether you are a busy hospital, clinic or private office, you are looking at getting things done faster and easier with the best possible output. With a user-friendly interface and secure data transmission to protect patient information, Winscribe's Medical Mobility Suite allows users to manage dictations, schedule patient appointments and access patient information, all while using their iPhones and Windows Mobile devices.

Winscribe's Medical Mobility Suite for Windows Mobile and iPhone platforms are exciting developments as the adoption of smartphone devices by healthcare providers increases. Not only do these applications enable physicians to instantly transfer dictations to typists while on the go, they also enable organizations who have already embraced mobility to deploy an advanced workflow system without incurring additional hardware costs.

**Recording and Patient Schedule Accessibility in One Tool.** Dictation via PDA or smartphone grants both flexibility and convenience to the physician with the functionality of a handheld recorder. Winscribe's Medical Mobility Suite was developed specifically for the healthcare environment and provides physicians with instant access to patient schedules. The Medical Mobility Suite also allows dictations to be captured without the need to dictate patient identifiers and work types resulting in improved accuracy and efficiency.

**Full Workflow Integration.** Winscribe's Medical Mobility Suite has been designed to integrate with the Winscribe Dictation workflow system, enabling users to effectively manage the dictation and transcription process from anywhere and allowing users to send dictations securely and monitor the progress of sent jobs. With options to route work directly to a secretary or transcription team, you have the power of choice in your hand. Dictations can be uploaded anywhere, anytime with patient demographics attached, ensuring document accuracy and accelerating the transcription process.

**Streamlined Workflow.** Winscribe's suite of mobile applications communicates directly with the Winscribe server, and dictations are immediately sent to transcription staff when an internet connection is present. This means that wherever your authors are, dictations are instantly made available to transcription staff, allowing for a more streamlined workload without peaks and troughs.

*\* When a connection is not present, dictations are saved to the local device or flash memory card and sent promptly when a connection is restored.*

**Secure Voice and Data Transmission.** Winscribe's mobile applications allow dictations to be sent directly to a Winscribe server through a secure HTTPS transmission to meet the requirements for secure client data transmission. Mobile Windows device users can also be configured to use 128-bit encryption, ensuring patient confidentiality is never compromised.

### Advantages of Winscribe's Medical Mobility Suite:

- Improved physician productivity
- Reduced document turnaround time
- Immediate access to patient information
- Better patient health information security

*Better technology for better patient care!*

winscribe **DICTATION**

### Speech Recognition Integration.

Winscribe Pocket Author for Healthcare records using high quality audio suitable for use with Winscribe's server based speech recognition solution. Authors are free to dictate anywhere, anytime and have their dictation automatically routed for recognition. This optional functionality greatly improves document turnaround time.

### Winscribe's Mobile Technology.

Winscribe has supported mobile dictation since the first version of the Windows Mobile Operating System was released in 2000. Winscribe's commitment is to provide access to the latest technology available so that our customers can take full advantage of the most sophisticated mobile applications in the market.

## Models Supported

### iPhone

Winscribe MD supports iPhone devices\* running iPhoneOS v. 3.1.3 and above, including:

- iPhone 3G
- iPhone 3GS
- iPhone 4

*\*This application can also run on an iPod Touch and an iPad with the addition of an external microphone.*

### Windows Mobile Device

The following operating systems are compatible with Winscribe's Medical Pocket Author:

- Windows Mobile 2003 Second Edition
