

# Winscribe MD Mobility Suite

Advanced Medical Dictation for Android™, iPhone® & BlackBerry®

Whether you are a busy hospital, clinic or private practice, you are looking at getting things done faster and easier with the best possible output. With a user-friendly interface and secure data transmission to protect patient information, Winscribe MD for Android, BlackBerry and iOS mobile devices allows users to manage dictations, schedule patient appointments and access patient information, all while using their preferred mobile devices.

Winscribe MD is an exciting and highly useful development, as the adoption of smartphone and tablet devices by healthcare providers increases. Not only do these applications enable physicians to instantly transfer dictations to typists while on the go, they also enable organizations who have already embraced mobility to deploy an advanced workflow system without incurring additional hardware costs.

## Manage Dictations with Patient Schedules

Dictation via smartphone or tablet grants both flexibility and convenience to the physician with the functionality of a handheld recorder. Winscribe MD was developed specifically for the healthcare environment and provides physicians with instant access to patient schedules. Winscribe MD also allows dictations to be captured without the need to dictate patient identifiers and work types resulting in improved accuracy and efficiency and eliminating the risk of mistaken identity.

## Full Workflow Integration

Winscribe MD has been designed to integrate with the Winscribe Dictation workflow system, enabling users to effectively manage their dictation and transcription processes from anywhere and allowing users to send dictations instantly and securely. With options to route work directly to a secretary or transcription team, you have the power of choice in your hand. Dictations can be uploaded anywhere, anytime with patient demographics attached, ensuring document accuracy and accelerating the transcription process.

## Streamlined Workload

Winscribe's suite of mobile applications communicates directly with the Winscribe server, and dictations are immediately sent to transcription staff when an internet connection is present.\* This means that wherever your authors are, dictations are instantly made available to transcription staff, allowing for a more streamlined workload without peaks and troughs.

\* When a connection is not present, dictations are saved to the local device or flash memory card and sent promptly when a connection is restored.

## Faster Document Turnaround through Optional Speech Recognition Integration

Winscribe's mobile applications record using high quality audio suitable for use with Winscribe's server based speech recognition solution. Authors are free to dictate anywhere, anytime and have their dictation automatically routed for recognition. This optional functionality further improves document turnaround time.

## Secure Voice & Data Transmission

Winscribe's mobile applications allow dictations to be sent directly to a Winscribe server through a secure HTTPS transmission to meet the requirements for secure client data transmission

## Models Supported

### Android Smartphones & Tablets

Winscribe MD for Android supports Android-powered smartphones running v.1.6 or higher. In addition, Winscribe's Android app can be downloaded from Google Play store onto the latest tablet devices like Google Nexus and Samsung Galaxy Tab. A Secure Digital (SD) card must be used with the Android device.

### iOS (iPhone, iPad and iPod Touch) Devices

Winscribe MD for iOS supports devices running iOS v.3.1.3 and above, including:

- iPhone 3G and 3GS
- iPhone 4 and 4S
- iPhone 5, 5C and 5S
- iPhone 6 and 6 Plus
- iPod touch (requires a microphone & headset)
- iPad, iPad 2 and iPad mini

### BlackBerry Smartphones

Winscribe MD for BlackBerry supports:

- BlackBerry Z10, Z30, and Q10
- BlackBerry software Version 10 or higher

## Innovative Features:

- Record and send dictations immediately (or send from drafts once dictation is completed)
- Online/Offline functionality
- Secure patient data transmission via HTTPS over wifi, 3G, 4G or LTE connections
- Select the quality of audio recordings
- Bluetooth functionality
- Prioritize dictations
- HL7 compliancy
- View job progress and set 'required by date' for jobs
- Tablet support
- Full integration with Winscribe Dictation, a digital dictation workflow management system
- Access to speech-recognized text and fully formatted documents via your tablet or smartphone (requires speech recognition add-on)
