

Winscribe MD

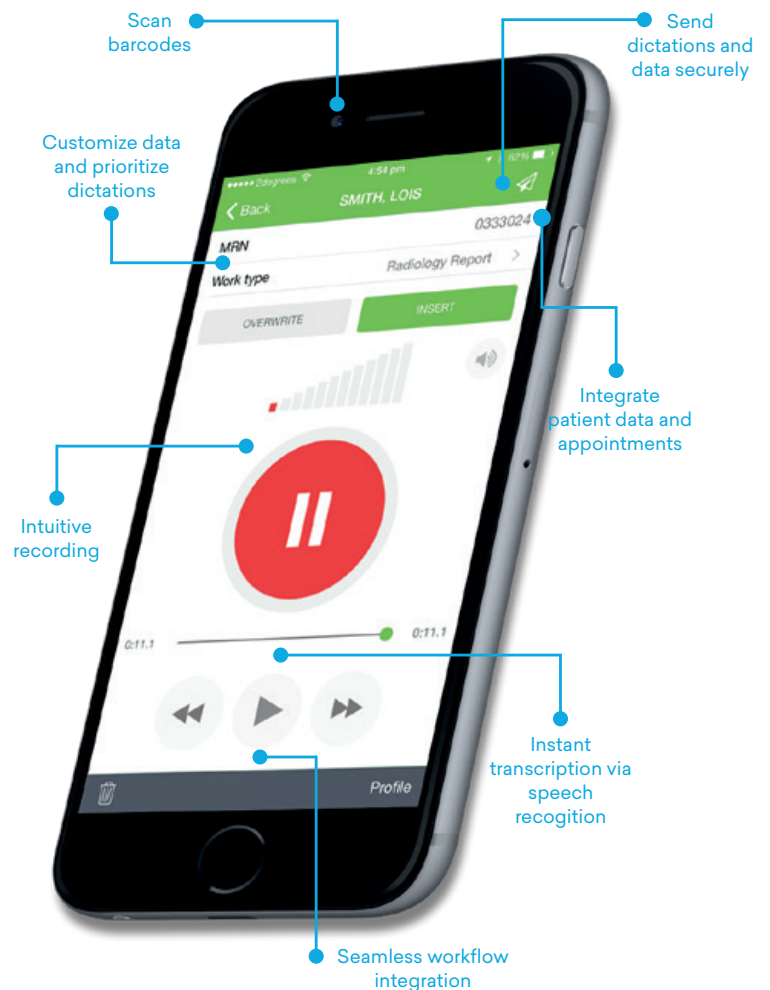

Product Description

Whether you work at a busy hospital, clinic or private practice, you are looking at getting things done faster and easier with the best possible output. With a user-friendly interface and secure data transmission to protect patient information, Winscribe MD for Android and iOS mobile devices allows users to manage dictations, schedule patient appointments and access patient information, all while using their preferred mobile devices.

The Winscribe MD mobile dictation app provides an intuitive and easy-to-use user interface. Dictations can be created and sent with minimal clicks. Wireless connectivity with the Winscribe server ensures real-time updating and immediate transmission of dictation for traditional or speech recognized transcription.

Winscribe MD works seamlessly with Winscribe's digital dictation workflow system, enabling users to quickly record and send dictations securely from anywhere. With options to route work directly for traditional or speech recognized transcription, you have the power of choice in your hand. Dictations can be uploaded anywhere, anytime with patient demographics attached, ensuring document accuracy and accelerating the transcription process.

“Not only are we able to use our iPads and iPhones for dictation... we are also now able to record and send dictations from wherever we are.”
